About

With 5 years of commercial experience, I have worked in startups, fintech, and outsourcing environments, building projects from the ground up. Skilled in React and Next.js, I focus on clean, scalable code and effective design patterns to deliver maintainable applications and great user experience. Basic experience with Docker, and CI/CD pipelines allows me to contribute to full development workflows.

Experience

Senior Frontend Developer | Neomaind   07/2024 - 08/2025, (1 yr 2 mos)

- Developed two projects to a stable version:
  - E-commerce website
  - Admin dashboard
- Integrated the client-side of the payment gateway (acquiring)
- Optimized the performance of the e-commerce website (page load time reduced by ~40%, improved user experience)
- Implemented testing, which reduced the number of bugs in production

Technologies: React, Next.JS, TypeScript, React-Query, Jest, SCSS, Redux, MUI, CI/CD.

Frontend Developer | Dronshub   06/2022 - 06/2024, (2 yrs 1 mo)

- Developed client-side applications using React, created new features, and improved application accessibility by adding multilingual support, which contributed to an increase in the company's revenue
- Actively participated in enhancing the user experience (UX), suggesting new ideas to improve the interface
- Developed and maintained a dashboard project, including an authentication system and application pages
- Developed an application for tournament management: creation, modification, deletion, and real-time monitoring of tournaments

Technologies: React, Vite, TypeScript, React-Router, SCSS, Recoil, Socket.IO.

React Frontend Developer | AlgaTop   06/2020 - 04/2022, (2 yr 11 mos)

- Contributed to the development and optimization of a Kanban board for managing tasks and business processes on the platform
- Developed user interfaces focused on accessibility for all users, including those with disabilities
- Provided suggestions for improving UX and expanding the product's functionality.

Technologies: React, Vite, TypeScript, React-Router, SCSS, Redux.

Skills

Programming Languages: 🆂 JavaScript / 🆃🆂 TypeScript
Tools and Frameworks: React, Next.JS, Vite, Redux, Zustand, React-Query(Tanstack), SCSS, Tailwind, Jest, Docker, CI/CD, Framer-Motion
Languages: English (C1), Russian (native)

Education

Ivanovo State Power Engineering University   Ivanovo, Russia
B.Sc. in Computer Science   2016 - 2020
